PROFILE

I am a Computer Science graduate from UCL with a year of experience in a London-based healthcare communications agency. With strong attention to detail and adaptability, I thrive in a fast-paced environment and enjoy developing solutions to achieve client objectives. My career goal is to grow as a full-stack software engineer while building impactful products that solve complex user problems.

PROFESSIONAL EXPERIENCE

Microsoft

London, UK

Software Developer MSc Thesis Project

06/2024 - 09/2024

- Developed UI Copilot – a full-stack AI-powered Visual Studio Code extension using TypeScript, React, and OpenAI API to create a visual designer for modern Windows frameworks and accelerate front-end development for beginners.
- Implemented comprehensive unit and integration testing.
- Invited to showcase project at Microsoft Reactor event held in the London office.
- Created detailed technical documentation for maintenance and scalability.
- Demonstrated strong teamwork and effective organization to deliver high-quality software within tight deadlines.

TVF Communications

London, UK

Senior Digital Campaigns Executive

07/2022 - 07/2023

- Managed digital projects including website development and omnichannel campaigns across 5 global accounts.
- Implemented data-driven solutions using Google Analytics 4, delivering quantitative reports and interactive dashboards on a monthly and quarterly basis.
- Built and maintained strong client relationships through proactive communication and regular feedback sessions.
- Collaborated in a small specialised digital team of 6 members, taking ownership of client-facing projects.
- Contributed to the team exceeding KPI targets for 12 consecutive months, achieving over 100% in revenue growth, business development, and client invoicing.
- Developed custom solutions to resolve unique client challenges.
